

Profile

Shah Enterprise is a young and dynamic company engaged in a wide range of products and services. The company acts as a frequent provider, supplier & consultant in the country's poultry industry, spinning mills, business process outsourcing agent, telecom & internet systems. Apart from this, it also provides internet based application services, industrial services, internet services, Marketing Services and many more.

Shah enterprise was formed in a vision to initiate the newly adopted features of today's latest communication media for sourcing business or more precisely a trading house to import, export & indent products & services to & from the country. For better management Shah Enterprise was decentralized from its mother concern Impex Exertion (IE), yet all administrative functions are guided & instructed by IE.

We have strongly developed our level of communication to the topmost & 'State of the Art' way. Having in house developed & maintained online server, strong online communication channel with Email, Live Support Chat, Web Based Cataloguing & all other conventional correspondent media alike Fax, Telephone, Mobile, SMS. No matter in which Global part you reside in, can get us in touch easily & we do always ready by your side to cooperate you.

Our vision

On a global scenario, we are tending to be the best sourcing agent for & to Bangladeshi business concerns. Maintaining a transparency in import-export equilibrium, we are committed to provide with our best effort & service.

Clients

We want to be our clients' best partner. Their requirements drive our actions.

Competency

We are committed to excellence in QMS services, direct principal cum producer relationship & effective communication.

Concentration

We focus on products & related best market prices where we can achieve & earmark our position.

We are a team

Though an organizational structure is divided traditionally into Organization, Division, Sub division & Department- but we are a team to work as a "nucleic cell" - a total team effort is our nature of doing business & serving to our clients.

PRODUCTS & SERVICES

Meat & bone Meal (MBM)

Shah Enterprise has successfully contributed to the poultry industry of Bangladesh, by importing & indenting feeder item with High Quality protein from the EU countries. After a committed ordering quantity per year, the company has gained the trust to be appointed to be the Sole Distributor of MBM50 of Eifel Mineral- Germany.

Meat and bone meals as well as bone meals are used in pig, poultry, and fish nutrition and as an ingredient in pet food, if there are no problems of

acceptance. The feeding value of these products is found to be high. As results have shown protein content varies between 49% and 68% in DM and the digestibility ranges from 83% to 86% in pigs and from 68% to 91% in poultry respectively. The values for fat content- important for energy concentration- were analyzed to be in the range

from 9% to 15% in DM and the digestibility was measured from 67% to 90% in pigs and 83% to 99% in poultry respectively. From these results an energy value for pigs was calculated to be between 12 MJ Metabolically Energy (ME) in bone meal up to 15.7 MJ/kg DM in a high protein meat and bone meal. The corresponding data for poultry were determined to be 10.0 MJ and 11.0 MJ AMEN/kg DM respectively. As these products are additionally rich in calcium and phosphorus, the formulation of rations has to take into account this fact. Especially in case of phosphorus it is necessary to avoid an over supply.

Other Poultry Related Products:

We also procure other poultry related feed ingredients alike Meat Meal, Feather Meal, Fish Meal, Maize, Di-Calcium Phosphate and Mono Calcium Phosphate

Raw Cotton

Shah Enterprise deals in domestic agent Raw Cotton and fabrics. The company has been providing dedicated services to the Textile Industry in

Bangladesh. It started its operations in the year 2000 as a sourcing agent & local agent for Raw Cotton. The company has expanded its wings to Yarn, Gray/Finished Fabrics and Readymade Garments.

No other material is quite like cotton. It is the most important of all natural fibers, accounting for half of all the fibers used by the world's textile industry. Cotton has many qualities that make it the best choice for countless uses:

- Cotton fibers have a natural twist that makes them so suitable for spinning into a very strong yarn.
- The ability of water to penetrate right to the core of the fiber makes it easy to remove dirt from the cotton garments, and creases are easily removed by ironing.
- Cotton fabric is soft and comfortable to wear close to skin because of its good moisture absorption qualities.

Shah Enterprise participates on day to day Raw Cotton bid to its existing & potential clients at the textile & composite textile mills.

Industrial Automation

Industrial automation is the most demanding & expanding advancement of successful biz enhancement tool & policy to adopt in order to keep pace with the advanced countries. Shah Enterprise provides complete industrial automation solution including specialty products designed for industry-specific applications. It combines state-of the-art positioning technologies to deliver high performance and custom engineered solution like the integrated condition monitoring equipment which proactively identifies minute changes in machine condition to prevent problems before they become apparent.

Our supportive range in automation industry bundles with the following sectors-
